Hiring Manager
BMO Financial Group
1 First Canadian Place, 21st Floor
Toronto, Ontario M5X 1A1

Re: **Application Software Developer (1800023658)**

Dear Hiring Manager

My interest in information technology field led me to apply for the **Application Software Developer** position at BMO Financial Group. My specialty is object-oriented coding and Android Application developing, I am planning to expand my knowledge in all area to eventually be able to co-relate all relevant information into a single project and see the manifestation of my knowledge before me. There would be no greater opportunity to allow my knowledge to grow and expand than working at BMO Financial Group as they are recognized as a Canadian Mobile banking leader as well the Corporation that has the Top Digital Innovation Award.

As a student at Centennial College, I have learned to document and launch projects using Agile Methodology with many of the applications that we have built. Workers Hub was an android application that a few colleagues and I had developed to help be more efficient and well as help employees be notified of their work schedule. In this group I was tasked with creating UML diagrams and writing descriptions for business aspect. I was also tasked with coding the database information that was stored in as well as work with a partner on the communication module of the application. I have also built a portfolio website using the .Net framework as well as Node JS which can be found on my GitHub. Currently working on a food management app using SDLC methodology and UML diagrams to propose a food management system for Centennial College Progress Campus. A protype website was built, current developing the android application version which would be released by April 2019.

I would welcome the opportunity to attend an interview to discuss my qualifications for this position in person. Thank you for your time and consideration.

Sincerely,

Kapilan Santhiramohan
